

SECURITY / ACCESS / NETWORKING / AUDIO & VIDEO

Built on experience. Backed by Sherwood.

Security, audio, video and networking systems for Vancouver Island.

Illustrative property image. Systems are designed for each location.

One team. Systems planned to work together.

Video Surveillance

Clear views, useful recordings and authorised remote access. Local, cloud and hybrid options with suitable AI features.

Intrusion alarms & monitoring

New installations, upgrades and troubleshooting, with Canadian monitoring options and local support.

Networking & Wi-Fi

Data cabling, wireless coverage and suitable building links. Reliable connections for people and systems.

Access control & gate entry

Manage doors, gates and parking with cards, fobs, mobile access and practical opening schedules.

Intercom & visitor entry

Telephone and video entry for strata, apartments and workplaces, with compatible door release.

Audio & Video

Home theatre, whole-home music, meeting-room systems, displays and digital signage for homes and businesses.

Start with a project consultation.

Local businesses. Real-world needs.

Commercial premises

Shops, offices, restaurants and service businesses.

Industrial & construction

Workshops, job sites, warehouses and equipment yards.

Illustrative settings, not photographs of customer installations.

Clear advice. Careful work. Continued support.

Understand your property

Review the space, existing equipment and how your team uses it.

Make the plan clear

Explain the scope, installation and any ongoing services before work begins.

Install & demonstrate

Test the system, demonstrate everyday controls and explain local support.

Licensed, qualified and locally accountable.

Licensed BC security company - security business licence B6576.

Electrical contractor licensed by Technical Safety BC - licence 39957.

BC Trade Qualification in Security Alarm Installation and Service.

Kantech Corporate | DSC Certified | CEDIA Advanced EST | THX Level 2

Licensed, bonded and insured.

Support beyond the installation.

Troubleshooting, upgrades, preventative maintenance and monitoring takeovers. Also available: construction-site security and monitoring connections for existing building fire alarm systems.

Fire alarm work described here covers monitoring connections, not building fire alarm installation or maintenance.

Tell us about your project.
